About me

I am a proactive individual committed to continual learning for professional and personal growth. Dedicated to acquiring problem-solving skills and diverse experiences, I stay current with emerging technologies. My tech-savvy and forward-thinking approach positions me to effectively tackle challenges in both my career and daily life. I am driven by a passion for staying ahead in the industry and leveraging innovative solutions to contribute meaningfully to my field.

Skills

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Education

2005-2016	Presidency School R.T.Nagar ICSE	88.2%
2016-2018	Sri Chaitanya Techno School CBSE 11th & 12th	73.4%
2018-2022	Dayananda Sagar University B-tech Electronics and Communication	7.42 CGPA
2023-2025	University of Arizona(Arizona,USA) MS - Information Science/Machine Learning	

Projects

Web-scraping of The Movie Database[TMDB]

- Applying web-scraping techniques to automate the extraction of data from the website(The movie database) and converting that into a database for further analysis.

Hearing Aid using Matlab

- Simulating hearing aid having noise filters and amplifying the signal using matlab

House Price Prediction

- Machine Learning project Using Xgboost algorithm to predict the price of the house using pre obtained training and testing data.

Low Cost Microstrip antenna

- Designing a double sided E shaped antenna using CST studio

Telematics Unit

- This forms one aspect of a three-part project: data collection from an Electric Vehicle (EV), relayed to an ESP32 microcontroller, and then transmitted to the cloud via WiFi for analysis.

Tools

- Windows
- Linux
- Jupyter Notebook

Other Highlights

- Served as the MDC Chair in the IEEE Club at Dayananda Sagar University.
- Participated in the Google Cloud skill challenge and gained brief experience with AWS cloud services.
- Attended workshops on virtual labs, Machine Learning

Hobbies

- Reading, Photography, Travelling
